Lake Chad Basin Resilience Fund — Quarterly Technical Report

Grant LCBRF/NG/2026/WASH-031. Grantees submit a quarterly technical report within 15 days of the end of each quarter. Report verified results against the logframe in plain, factual English, in the third person. Do not use promotional language. Disaggregate people-level results by sex and state clearly which results were not measured.

1. Executive Summary

Summarise the quarter in no more than 300 words: the main results, the main problems and the adaptation made.

2. Context and Needs Update

Describe changes in the humanitarian context, access and needs in the four LGAs during the quarter.

- Which new needs or risks arose?

3. Results by Outcome

Report outcome indicators and explain the movement from the baseline.

3.1 Outcome 1: Safe water and sanitation

Report progress on water points, latrines and WASH blocks, with a results table: indicator, quarter value, cumulative, target, percent of target.

- Explain any output behind plan.

3.2 Outcome 2: Hygiene and management

Report hygiene promotion reach by sex, committee training and functionality.

4. Compliance with Sector Standards

State how the water points and sanitation facilities met SPHERE minimum standards and the national WASH cluster guidance.

- Report the water quality results and the percentage of water points that met the chlorine residual standard.

5. Protection, Gender and Accountability to Affected Populations

Report on protection, gender equality and inclusion, and summarise complaints received and resolved.

- Any safeguarding incident or protection concern?

6. Financial Summary

Provide budget, expenditure and balance by budget line for the quarter, and explain any variance above ten percent.

7. Risks, Lessons and Adaptation

Update the risk register, state the main lessons and any change needing the Fund's agreement.

8. Plan for Next Quarter

State the planned activities and expected results.
